### Short Description

---

--

### Description

---

**Non-rotating Helical Micro Focuser with M48 male thread for full frame camera connection and M48 female thread on telescope side with a 2" nosepiece included and 0.1mm scale for very precise focusing, 40mm focus travel**

The 2" nosepiece also features a standard M48 filter thread for 2" filters

The attached accessory (i.e. camera) stays in position when you turn the focusing as it is a non-rotating helical focuser.

### **Features of the Non-rotating 2" Helical Micro Focuser**

2 x thumbscrews to secure position of the focuser when you use some very heavy equipment there

M48 thread at top end to attach the imaging camera or other accessory

For its size it is light weight: 270g

Optical length: 55mm - 95mm

Focus travel: 40mm

Telescope side thread is M48, but a 2" nosepiece is also included

Internal diameter at telescope side: 43.5mm
