### Product Images

## Short Description

---

The all-rounder saxon 767AZ Reflector Telescope features easy assembly and portability, making it THE scope for beginner astronomers. This telescope comes with a focal length of 700mm and an aperture of 76mm which will give you good views of the Moon, planets, bright nebulae and star clusters. The aluminium optical tube also has a rack-and-pinion focuser, ensuring smooth adjustments to focus your object into place. This scope's accessory pack includes three 1.25" eyepieces, a finderscope, an erecting eyepiece, a moon filter and an adjustable aluminium tripod with accessory tray. For a great beginner scope without the hefty price tag, look no further than the saxon 767AZ Reflector Telescope.

## Description

---

The **saxon 767AZ Reflector Telescope** is a great beginner telescope to start your astronomy journey with.

Spend time with the family in the backyard stargazing with this portable and easy to use telescope. The quality optics and 76mm aperture provides enough light to enable bright views of the sky. Setup is quick and painless, which means you'll be viewing Moon craters, planets, bright nebulae and star clusters in no time!

The **saxon 767AZ Reflector Telescope** features the following:

- 76mm aperture
- 700mm focal length
- Three 1.25" eyepieces (4mm, 12.5mm and 25mm) giving a broad range of magnification
- 5x24 finderscope
- 1.5x erecting eyepieces for terrestrial viewing
- 1.25" Moon filter.
