10 Inch Dobsonian/Newtonian Essentials Kit

AUD
\$135.00

Product Images

Short Description

Save on these must-have accessories for your Newtonian or Dobsonian telescope.

Includes:

Description

All Newtonian and Dobsonian telescopes need to have their mirrors checked and realigned occasionally. The easiest way is to use a a laser collimator. The [Saxon 1.25 inch Laser Collimator with 2 inch Adapter](#) makes collimating your reflector telescope easy, and you can use it in the dark too.

To protect your scope optics from dust in storage we recommend the [Pegasus Dust Cover for 10 Inch Dobsonian](#) for the bottom primary cell of your scope and the top secondary cell.
