## Orion 42mm Deep View Eyepiece 2 Inch

**AUD**  
**\$175.00**

### Product Images

---

## Short Description

---

- This 42mm 2" telescope eyepiece offers bright, sharp and pleasing images of deep-space objects
- Eyepiece's 3-element lens design with multi-coatings ensures efficient light transmission for clear, vivid views
- Eye relief is a long 20mm, particularly attractive to eyeglass wearers
- Views through the 42mm DeepView eyepiece are delightfully free of pincushion distortion and chromatic aberration
- Threaded for use with 2" eyepiece filters

## Description

---

Assuming that you don't subscribe to the misconception that strong magnification gives better views of deep-sky objects, then our Orion DeepView 42mm 2" Telescope Eyepiece should excite you. Why? Because the brightest and sharpest images of deep-space objects are obtained with low power and a wide field of view, and DeepView 2" eyepieces deliver just that.

DeepView telescope eyepieces feature anodized aluminum housings and a 3-element lens design with multi-coatings for efficient light transmission. Eye relief of each DeepView telescope eyepiece is a long 20mm - a welcome spec for eyeglass wearers - and the rubber eyeguards fold down out of the way if desired. The 42mm DeepView eyepiece features a wide 52-degree apparent field of view. Delightfully free of pincushion distortion and chromatic aberration, DeepView 2" telescope eyepieces will impress even the seasoned deep-sky observer. The barrels are threaded to accept 2" eyepiece filters.
