AstroZap Flex Dew Shield for Starmax 90

AUD \$59.00

Product Images

Short Description

Flexible plastic dew shield, no notch

Description

- The dew shield is the basic component of the passive dew fighting system, with the added bonus of shielding the telescope from undesirable stray light.
- Felt-lined to help absorb moisture and to prevent extraneous light from reaching the optics, greatly improving contrast.
- Made from the highest quality ABS-grade polymers.
- Padded so as not to mar or scratch the telescope's finish, with velcro fasteners providing a snug fit.
- Rolls up easily into a convenient size for easy transportation to star parties and dark sky sites.
