Astrozap Flexi-Heat Dew Shield for 14 Inch SCT with Two Notches

AUD
\$299.00

Product Images

Short Description

Flex-Heat dew heater specs: 19.2 Watts @ 12 Volts, 1.65 Amps.

NOTE: Sirius Optics recommends that any dew heater strap or heated dew shield be connected to a dual channel dew controller and not directly to 12V.

This allows the user to regulate the current and temperature of the dew heater strap or dew shield.

The recommended control unit is the Astrozap Dual Channel Dew Controller (Product No. 124474)

Description

- The Astrozap Flexible Heated Dew Shield uniquely combines both active and passive methods of dew fighting with the added feature of shielding the telescope from undesirable stray light.
- Felt-lined to help absorb moisture and to prevent extraneous light from reaching the optics and greatly improving contrast.
- Astrozap heated dew shields are made from the highest quality ABS-grade polymers.
- Velcro fasteners provide a snug fit and padded so as not to mar or scratch the telescope's finish.
- They roll up easily into a convenient size for easy transportation to star parties and dark sky sites
