### Product Images

### Short Description

The top of the line Bushnell Forge Spotting Scope allows up to 60x magnification alooking through a large 80mm front objective. This combination combines to allow you to glass faraway targets with high resolution and superb light transmission in any lighting condition.

### Description

The Forge spotters sport fully multi-coated optics, featuring multiple layers of anti-reflective coating on all air-to-glass surfaces, delivering bright, vibrant images. The Forge range of scopes feature Bushnell's exclusive EXO Barrier technology, which coats the lenses, molecularly bonding to the glass to preventing scratches and repelling water, dust and debris.

Bushnell spotting scopes also give you the advantage from the world's high point of brightness, clarity and edge-to-edge detail – whether you're birding at sea level or hunting above timberline. The HDOS (High definition optical system) combines our key technologies: ED Prime Extra-Low Dispersion glass, premium BaK-4 prisms and fully multi-coated lenses.

Together these deliver flawless color fidelity, ultra-crisp images and optimum light transmission.

- Terrain with angled eyepiece
- Exclusive EXO Barrier Protection - Bushnell's newest and best protective lens coating molecularly bonds to the glass, repelling water, oil, dust, debris and preventing scratches.
- Fully Multi Coated - Multiple layers of anti-reflective coating on all air-to-glass surfaces deliver bright, high-contrast images.
- IPX7 Waterproof construction - O-ring sealed optics stay dry inside, when immersed in three feet of water for up to 30 minutes.

To get the best results out of the Forge spotter, use a tripod to limit movement and get the clearest view of your target.
