## Celestron 12x56 Nature DX Roof Prism Binoculars

**AUD**  
**\$429.00**

### Product Images

### Short Description

- Designed with the outdoor enthusiast in mind, waterproof and fully rubber armored
- Phase coated BaK-4 prisms for increased contrast and resolution
- Fully multi-coated optics provide brighter images by increasing light transmission through the entire optical path
- Close focus of 9.8 feet for viewing nearby subjects
- Sturdy, twist-up eyecups with multiple stops. Eyeglass friendly with 16 mm of eye relief

## Description

---

Celestron's Nature DX 12x56mm binoculars are the perfect companion for your next outdoor adventure. A great first step into the world of serious sport optics, the views through Nature DX rival those of more expensive binoculars, at a price to fit your budget.

With phase-coated BaK-4 prisms and fully multi-coated optics, Nature DX reveals image detail you won't find with other entry-level binoculars. And when you're off the trail, enjoy superb views of concerts, sporting events, and more.

### **Sophisticated optics**

Nature DX's high quality BaK-4 prisms are phase coated to increase contrast and resolution. Phase coated prisms, combined with fully multi-coated lenses, provide maximum light transmission through the entire optical path, for brighter images, even in low light conditions.

With 12x magnification and 56mm objective lenses, Nature DX 12x56mm strikes the perfect balance between performance and ease of use. Acquire and follow your subject quickly in the wide field of view. Or, observe nearby subjects like plants and insects with a close focus of just 9.8 feet.

### **Binoculars that fit your lifestyle**

A durable rubber armored, polycarbonate housing protects your Nature DX binoculars from damage without weighing you down. Twist-up eyecups with multiple stops ensure proper positioning of the eyes, even for eyeglass wearers.

Waterproof, fogproof, and nitrogen purged, these binoculars can withstand the elements. They're easy to pack, even for long excursions, and fit comfortably in a glove box or oversized pocket.

### **Bird watching made easy**

Birders will love Nature DX for its bright, sharp views of distinguishing features and markings. You'll get more bird identifications and more enjoyment from each birding outing. The 12x56mm model is a favorite among beginning and intermediate birders, since birds are easier to locate and follow in its wide field of view. Take your passion for birding to the next level with Nature DX!
