# Celestron 3D Bug Specimen Kit No 3

**AUD \$39.00**

## Product Images

## Short Description

---

Real 3D bug specimens preserved in resin. This kit includes:

- Jewelled Frog Beetle
- Golden Cicada
- Small Stag Beetle
- Ant & Red Bean

## Description

---

Bug out with this set of 4 real, 3D insect specimens perfectly preserved in resin. These specimens are ideal for observing and imaging with any Celestron digital microscope. Crystal clear resin lets you observe the insects from all angles. Use them for school projects, research, and more.

These specimens make the perfect gift for the young scientist in your life. They'll love learning about fascinating insects from around the world, and studying their anatomy up close. Your little entomologist can even display the insects in his or her room when not in use.

This kit includes:

- Jewelled frog beetle
- Golden cicada with large wings
- Small stag beetle
- Ant preserved with a red bean

Celestron offers sets of 3D bugs to choose from: collect them all!

## Additional Information
