## Celestron 40 Inch (101cm) Telescope and Tripod Bag

**AUD**  
**\$199.00**

### Product Images

### Short Description

- Store your entire telescope kit—optical tube, mount, and tripod—in one protected, portable, grab-and-go case.
- Ultra-durable 900 denier outer and super smooth inner polyester layers, sandwich 16mm thick EPE foam sheets to create a protective barrier for your telescope, tripod and mount.
- A PVC-reinforced hard bottom panel provides extra protection from the elements and minor bumps
- Three configurable, padded internal walls with Velcro strips help you get the perfect, customized fit for all your gear.
- Stash accessories in the external zippered pocket, bonus padded accessory bag, or clip them to the case's external loops.

## Description

Optical tube in one hand and tripod in the other? Still carrying your bulky telescope box to remote observing sites? Let us lighten your load with our sleek, padded, protective telescope soft case. This all-in-one storage solution is the perfect choice for transporting your telescope setup anywhere with ease and confidence. It's truly a must-have for telescope owners of all stripes.

### Ultra-durable Material

The Telescope Soft Case is constructed from 900 denier polyester for durability and weather resistance. Its walls are lined with 16mm thick EPE foam to protect your gear. The bottom panel is reinforced with a hard layer of PVC for extra protection from minor bumps. On the exterior, you'll find hard rubber elements that provide extra strength and water resistance.

### Design your Custom Case

Unzip the case and you'll discover a soft polyester interior lining with three configurable EVA foam padded walls. Use the Velcro to place the foam walls in the exact configuration you need for your equipment, creating custom compartments for your optical tube, mount, and tripod. Once your equipment is stowed safely inside, secure it in place with the internal straps. With shorter tubes, you'll have some leftover interior space to stash extra accessories.

In addition to the configurable compartments inside, the case features a bonus 9" x 12" padded accessory bag and an external zippered pocket, for holding eyepieces and other accessories. Lastly, you'll find sewn-on fabric loops on the outside of the case. Use these to clip even more accessories to the exterior of the case.

### Grab and Go

Transport your case one of two ways: via the pair of sewn in handles or optional, clip in padded shoulder strap for hands-free carrying.

### Compatible Celestron Telescopes

AstroMaster Telescope Line	Astro Fi Wi-Fi Telescope Line
AstroMaster LT Telescope Line	Cometron 114AZ
PowerSeeker Telescope Line	LCM Telescope Line
StarSense Explorer Telescope Line	National Parks Foundation ExploraScope 60AZ
NexStar SLT Telescope Line	Omni XLT Telescope Line
Inspire Telescope Line	SkyProdigy Telescope Line

Additional Information

Specifications	Outer Material:	900 Denier Polyester
	Walls- Foam:	EPE Foam (16mm thick)
	Internal material:	PP webbing
