- Compact and ergonomic designed aluminum and plastic body fits easily in your hand and/or pocket
- Includes USB charging cable, wrist strap and soft carry pouch

Description

Mossy Oak Gamekeepers represent a culture who share the same underlying belief that being outdoors is just as much about hunting as it is loving the land, its wildlife, and giving back more than you take.

The GameKeeper™ FireCel+ is the ultimate multipurpose device for the outdoorsman. This rugged 3-in-1 tool features a hand warmer, a multi-mode flashlight, and a portable power supply for smartphones and personal electronics.

The dual mode hand warmer provides continuous, scent-free heat for up to 12 hours. Choose to heat just one side when FireCel+ is in a pocket, or both sides to warm hands. The 5200 mAh rechargeable lithium ion battery delivers 2 full charges to most smartphones and MP3 players, and also charges USB-powered sports cameras and most any other USB powered electronic devices. An integrated flashlight features both red and white LEDs with five modes, including SOS for unexpected emergencies and the red LEDs are ideal for preserving your night vision.

The GameKeeper™ FireCel+ has high quality aluminum shell that is rugged enough for outdoor use, and compact enough to fit in your back pack, pocket or glove compartment. Never leave home without your FireCel+
