

Celestron Narrow Dovetail Bar Kit for 8 Inch Cassegrain OTAs (CG5)

AUD \$89.00

Product Images

Short Description

- Fits pre-drilled holes in the front and rear cells of current 8" Schmidt-Cassegrain and 8" EdgeHD Optical tubes
- Aluminum bar with orange anodizing provides a sturdy mounting platform.
- Easy to install and comes complete with all necessary hardware

Description

This dovetail bar kit allows you to replace the wider CGE dovetail bar found on most Celestron 8" Schmidt-Cassegrain and 8" EdgeHD optical tubes with a narrow dovetail, allowing them to be used on mounts that require the narrower CG-5 dovetail bars, such as the Advanced VX mount.

Compatible with Vixen style dovetail saddles.
