Celestron PowerTank Glow 5000 - 25Wh Flashlight with Red LED

AUD
\$120.00

Product Images

Short Description

- A must-have 2-in-1 accessory for amateur astronomers: a red flashlight PLUS a USB power bank for charging mobile devices in the field.
- Red LED flashlight features three brightness levels to preserve your night vision.
- USB Type A output port charges smartphones, tablets, and other 5V DC electronics.
- Rechargeable 5000mAh 5V DC lithium-ion battery delivers a full recharge to smartphones.
- Silicone mount straps included to attach PowerTank Glow 5000 to your telescope tripod leg or other convenient locations.

Description

The PowerTank Glow 5000 is an essential for any amateur astronomer. This 2-in-1 device features a rechargeable handheld red LED flashlight with three brightness levels **and** a 5000 mAh 5V DC power bank to charge mobile devices. The PowerTank Glow 5000 attaches onto one of your telescope tripod legs or other convenient locations using one of the two included silicone straps so it is safe and out of the way. A wrist strap is also included for handheld use.

Perfect astronomy flashlight

A red flashlight is one of the most beneficial accessories you can own as an amateur astronomer, no matter how occasional your night sky observations may be. The PowerTank Glow is the perfect astronomy flashlight as this will not compromise your vision at night with its red LED flashlight. This flashlight has three brightness levels that allows you to adjust the brightness depending on how dark your observing site is. When your flashlight needs power, no need to change out your batteries like traditional flashlights, just recharge the PowerTank Glow.

The perfect power solution for SkyPortal and other planetarium apps

Explore the Solar System with your phone or tablet without draining your battery. With hours of continuous use, planetarium apps like Celestron's SkyPortal can drain your smartphone's battery. What's more, your phone may not be at 100% when you begin observing. Those worries become a thing of the past with PowerTank Glow 5000. This compact power bank delivers a full charge to mobile devices with its 5000 mAh capacity, so you can use your smartphone confidently to scan the skies, capture images through the eyepiece, and share the experience with friends on social media.

High quality lithium battery technology you can trust

The power bank has an output port for charging 5V DC devices, including smartphones and tablets. The input port is used to recharge the internal lithium-ion battery. The battery has a minimum of 500x charge cycles, so it can serve your astronomy needs for years to come. The input/output ports have integrated covers to protect them when they are not in use. The PowerTank Glow 5000 has overcharge protection, so the battery cannot be damaged if inadvertently left recharging for an extended period.

Easy to use in the field

The PowerTank Glow 5000 has a single button that controls all its functions. Short presses of the button turn the red flashlight on, cycle through the three brightness levels starting with the dimmest, and then turn the flashlight off. Pressing and holding the button turns device charging on and off.

The flashlight can be used while the output port is charging an external device. Four red battery indicator LEDs indicate the battery charge status, while a green LED indicates when the PowerTank Glow 5000 is providing power to a device.

Additional Information

Specifications	Battery Capacity:	25 Wh
	Charging Input:	5VDC @ up to 1800mA
	Charge Time (from flat):	3.5 hours (@ 1800mA)
	Telescope Power Port:	None
	Car Battery Adapter Port:	None
	USB Charging Port 1 Output:	5VDC @ 1A
	USB Charging Port 2 Output:	None
	Light Panel:	3 Red LED flashlight levels (low, medium, high)
	Weather Proof/Dust Proof:	IP-65 rating
	Telescope Power Cord:	None
	Strap:	Wrist strap, 2x silicone straps
	Product Dimensions:	140mm x 33mm x 33mm (5.5"x 1.3" x 1.3")
	Product Weight:	0.4 lbs (0.18 kg)
	Included Items:	Flashlight USB charging cable Wrist strap Two silicone straps
