Celestron Smart DewHeater Controller 2X

AUD
\$549.00

Product Images

Short Description

The Celestron Smart Dewheater Controller 2X uses real-time data and provides just enough power for your heaters to prevent dew from forming, prolonging battery life.

Description

“Smart control” system monitors ambient temperature and humidity and adjusts power to the dew heaters automatically.

Compatible with Celestron Dew Heater Rings and third-party heating bands or straps (with thermistor accessory).

Supports up to two dew heaters plus one additional 12V DC device, such as your mount.

Works with your Celestron telescope’s hand control or CPWI telescope control software so you can view data and make manual adjustments.

Mounts securely to your telescope's dovetail or tripod leg.

Durable metal housing features an integrated cooling fan to protect the controller’s electronics.
