Deep-Sky Companions: The Caldwell Objects

AUD \$79.95

Product Images

Short Description

Ideal for observers who have completed the Messier objects and are looking for their next challenge.

Description

The Caldwell Catalogue, compiled by the late Sir Patrick Moore (1923-2012), has delighted amateur astronomers worldwide since its publication in 1995. Twenty years on, Stephen James O'Meara revisits his guide to these 109 deep-sky delights, breathing new life into them and the 20 additional observing targets included as an appendix. This second edition retains O'Meara's detailed visual descriptions and sketches, accompanied by stunning new images taken by amateur photographer Mario Motta and observations by Magda Streicher. The astrophysical descriptions have been updated to account for the many advances in our understanding of the objects, not least due to an armada of space-borne observatories and the new technologies used in large ground-based telescopes. Ideal for observers who have completed the Messier objects and are looking for their next challenge, Deep-Sky Companions: The Caldwell Objects is a fitting tribute from a renowned visual observer to one of astronomy's most famous personalities.

Additional Information

Specifications

- Format Hardback | 573 pages
- Dimensions 190 x 261 x 29mm | 1,340g
- Publication date 02 Jan 2017
- Publisher CAMBRIDGE UNIVERSITY PRESS
- Publication City/Country Cambridge, United Kingdom
- Language English
- Edition Revised
- Edition Statement 2nd Revised edition
- Illustrations note 320 Halftones, unspecified; 200 Line drawings, unspecified
- ISBN10 1107083974
- ISBN13 9781107083974
