AUD
\$139.00

Product Images

Short Description

Farpoint Dew Shield - Celestron 14 Inch SCT is a tough cover that protects optical equipment and allows for moisture-free observing sessions.

Description

Farpoint Dew Shield - Celestron 14 Inch SCT

Farpoint Dew Shield - Celestron 14 Inch SCT is a virtually indestructible cover customized for Celestron 5/5SE SCT telescopes. Simply attach the flexible cover to the front of the optical tube to prevent moisture build-up on the lens. Made with tough, flexible ABS plastic and lined with black felt to cut down the reflection and prevent sliding onto the telescope corrector plate.

Protects delicate optical equipment and allows for moisture-free observing sessions.

When you are out on the field, make sure that your night-long set up is not interrupted by dew on your optics.

Farpoint Dew Shields and Dew Heaters are part of a perfect series of preventative measures you can take to make sure that your setup is prepared for the journey ahead. Our Shields are made with ABS polymer and proud to be made in USA.
