

Four Pack 1.5V Eclipse AA Lithium Batteries

AUD \$19.00

Product Images

Short Description

Economical 4 Pack of high power AA Lithium Batteries.

Description

When using Goto Telescopes, we strongly recommend the use of an external power supply/ jump starter, or high energy lithium batteries. Regular Heavy Duty and Alkaline Batteries often do not supply enough current to power a telescope effectively, causing star alignment problems.

This range of Lithium Iron Disulfide (LiFeS₂) batteries pack 5-6 times the capacity of their alkaline equivalents in high power applications. Using these represents a 40-60% cost saving over alkaline batteries.

Max constant load: 2000mA
