Short Description

German Precision Optics (GPO) are designed and engineered in Germany at the development and quality centre outside Munich.

GPO provides binoculars designed and tested to meet the needs of users from across the world for all their observation needs.

PASSION™ HD premium binoculars represent the height of design, function and performance they provide excellent light-transmission, edge-to-edge sharpness, close focus and brilliant colour reproduction.

Description

GPO Passion HD 10x50 Binoculars are Designed and Engineered in Germany, just that statement means that you are in for a treat when you look through these binoculars.

If you are needing a pair of binoculars for bird watching, nature, taking to the races , hunting or even astronomy these binoculars are superb.

The extra aperture of the 50mm objective lens means that you will get more light through the 10x50 over the 10x42, the trade off for this extra aperture does mean that the 10x50 are a bit heavier than the 10x42.

The Passion HD gives you amazing clarity, brightness and colour that you would expect from binoculars 2 or 3x times the price, don't forget the 10 Year warranty.

Seeing is believing come and try a pair today.

Specifications
