Short Description

A guide to the first comprehensive postprocessing platform to be created by astro-imagers for astro-imagers.

Description

PixInsight has taken the astro-imaging world by storm. As the first comprehensive postprocessing platform to be created by astro-imagers for astro-imagers, it has for many replaced other generic graphics editors as the software of choice. PixInsight has been embraced by professionals such as the James Webb (and Hubble) Space Telescope's science imager Joseph DePasquale and Calar Alto's Vicent Peris, as well as thousands of amateurs around the world.

While PixInsight is extremely powerful, very little has been printed on the subject. The first edition of this book broke that mold, offering a comprehensive look into the software's capabilities. This second edition expands on the several new processes added to the PixInsight platform since that time, detailing and demonstrating each one with a now-expanded workflow. Addressing topics such as PhotometricColorCalibration, Large-Scale Pixel Rejection, LocalNormalization and a host of other functions, this text remains the authoritative guide to PixInsight.

Additional Information

Specifications

- Format Paperback | 427 pages
- Dimensions 155 x 235 x 15.24mm | 932g
- Publication date 03 Jan 2019
- Publisher Springer International Publishing AG
- Publication City/Country Cham, Switzerland
- Language English
- Edition Revised
- Edition Statement 2nd ed. 2018
- Illustrations note 74 Illustrations, color; 217 Illustrations, black and white; XXV, 427 p. 291 illus., 74 illus. in color. With online files/update.
- ISBN10 3319976885
- ISBN13 9783319976884
