- Open bridge roof prism design
- Phase coated

- Twilight Max HD light management system
- Twist up eyecups
- Waterproof and fogproof

## Description

---

10x binoculars may be the Jack of all trades when it comes to glassing. With enough magnification for long-range identification, the 10x42mm and 10x50mm BX®-4 Pro Guide™ HD binos will also get the job done in tight situations; all while being compact and lightweight. Built around our Twilight Max HD Light Management System, the BX®-4 Pro Guide™ HD binoculars boast un-paralleled brightness, edge-to-edge clarity, and advanced glare management elements; helping you see more detail in less light. Their ergonomic open-bridge design is comfortable for extended glassing sessions and delivers key weight savings for those long backcountry adventures.

### Features:

- Delivers a perfectly round exit pupil with virtually no edge distortion and a crisp, clear image.
- Large, tactile focus dial is easy to find and use, even with gloved hands, which gives you the precision focus you need to pick antlers out of the trees or hide out of the brush.
- Our ergonomic design ensures our products are slim, lightweight, and fit well in your hands no matter what size they are.
- High-definition, calcium-fluoride lenses ensure incredible clarity at all magnification levels.
- Open bridge, roof prism design is extremely lightweight and ergonomic.
- Phase coated roof prisms significantly increase resolution for a sharp sight picture from edge-to-edge of the visual field.
- See more in less light with Twilight Max HD Light Management System
  - Adds up to 30 extra minutes of shooting light
  - Eliminates 90% more glare-producing stray light than competitors
  - Premium high definition edge-to-edge lens clarity
- Features twist-up eyecups and generous eye relief for comfortable extended viewing.
- Absolute waterproof and fogproof integrity means it's ready to perform in the field, in all conditions.
