Short Description

Save with the NexStar SE Essentials Kits. Get must-have accessories to get your Celestron NexStar SE Series (4SE, 5SE, 6SE, 8SE) up and running.

Includes:

- [Powertech Lithium Ion 155whr Portable Power Centre with LCD](#)
- [Sirius 1.25in 66 Degree Long Eye Relief Eyepiece 9mm](#)
- [Sirius 2.1mm 12V DC Power Cable for Go-To Mount](#)

Description

We have hand-picked selection of essential accessories to get you started with your Celestron NexStar SE Series telescope.

Your NexStar SE Series telescope comes with a battery compartment for AA batteries, however, in our experience using AA batteries to power your telescope leads to poor accuracy and poor tracking performance. It is important to provide a more reliable source of power to your computerised mount in order to get the best performance. This is especially important if you want to use your scope for astrophotography.

The [Powertech Lithium Ion 155whr Portable Power Centre with LCD](#) and the [Sirius 2.1mm 12V DC Power Cable for Go-To Mount](#) will provide your telescope mount with a constant and reliable source of power where AC power is not available.

The NexStar SE Series scopes only come with one 25mm Plossl eyepiece. We recommend getting at least one more of a higher magnification. This will help you with aligning your scope, and also let you view planets and other objects up close. Our [Sirius 1.25in 66 Degree Long Eye Relief Eyepiece 9mm](#) is a significant upgrade from standard Plossl eyepieces.

With a 9mm eyepiece, you can expect the following magnifications -

- 4SE: 147x
- 5SE: 139x
- 6SE: 167x
- 8SE: 226x
