## Orion Edge-On Planetary Eyepiece Set (12.5mm, 6mm, and 3mm)

**AUD**  
**\$629.00**

### Product Images

### Short Description

- Set of three high-magnification 1.25" Orion Edge-On Planetary telescope eyepieces designed for exceptional planetary and lunar viewing
- Starter Set includes 12.5mm, 6mm, and 3mm focal length Edge-On Planetary telescope eyepieces
- Flat field design ensures sharp focus out to the edge of each eyepiece's wide 55-degree apparent field of view
- Barrel distortion and field curvature commonly seen in standard eyepiece designs are delightfully absent in Orion Edge-On Planetary eyepieces
- Each included Edge-On Planetary telescope eyepiece has long 20mm eye relief for comfortable viewing with or without eyeglasses on

## Description

---

Edge-On Planetary Eyepieces bring flat-field performance to solar system viewing in the form of three high-magnification focal lengths. Each employs a sophisticated 7-element lens design reminiscent of exotic, high-priced oculars to provide a sharp focus all the way to the edge of their wide 55-degree apparent field of view. The barrel distortion and field curvature aberrations common in standard eyepiece designs are virtually gone. Edge-On Planetary Eyepieces let you push the power, whether you're canvassing the lunar terminator or studying the Jovian cloud belts. The 7-element optics are fully multi-coated for high light transmission, and each eyepiece has 20mm eye relief for viewing comfort. Other nice touches: blackened lens edges, pop-down rubber eyeguards, and barrels threaded for 1.25" filters. The Starter Set of Edge-On Planetary Eyepieces includes 12.5mm, 6mm, and 3mm focal lengths.

### Warranty

Limited Warranty against defects in materials or workmanship for one year from date of purchase. This warranty is for the benefit of the original retail purchaser only.

### Warning

Please note this product was not designed or intended by the manufacturer for use by a child 12 years of age or younger.
