Orion GiantView ED 16x80 Waterproof Astronomy Binoculars

AUD
\$799.00

Product Images

Short Description

- Extra-low Dispersion lenses for bright, true color views
- Large 80mm ED lenses pull in an immense amount of light
- 21mm eye relief provides plenty of comfort and distance for eyeglass wearers
- Tripod mounting pier allows attachment to any standard photographic tripod
- Includes lens caps, neck strap, and a soft carry bag to protect the optics

Phils Review: "This is my favourite astronomy binocular. I was so impressed by their quality I bought a pair and I can say they are awesome for viewing the night sky."

Description

Are you a serious amateur astronomer looking for the best and brightest wide-field images of the night sky with binoculars? The Orion 16x80 ED GiantView Binocular will fit that bill! These binoculars combine a large 80mm aperture with Extra-low Dispersion (ED) glass lenses for bright, exceptionally clear, true-color views of the night sky. Not to mention these binoculars work equally well for long distance daytime viewing. All of this in a waterproof body, with BAK-4 prisms, robust mechanical construction, and a solid pier tripod mounting system. And all these features for a very reasonable price.

You'll understand the combination of large aperture and ED lenses the first time you scan the Milky Way — pinpoint stars, with exceptional contrast against a dark background. Fully Multi-Coated surfaces provide the brightest possible images, and with 21mm of eye relief, even eyeglass wearers can view the entire field of view. And these binoculars boast a 4.0° field of view for scanning the skies, or watching distant wildlife.

The sturdy aluminum alloy binocular body with a second hinge between the objective lenses provides a solid, well collimated mechanical system. Glare-threaded and blackened interiors provide even more contrast with less light scatter. The built-in tripod mounting bar attaches securely to a standard photographic tripod, and each binocular comes with lens caps, neck strap and a soft carry bag.

Warranty

Limited Warranty against defects in materials or workmanship for one year from date of purchase. This warranty is for the benefit of the original retail purchaser only.

Specifications	Best for viewing	Lunar & planetary
	Magnification	16x
