Orion Microfiber Optics Cleaning Cloth

AUD \$17.00

Product Images

Short Description

- Handy and useful OptiCloth for wiping off fingerprints, smudges, or dust from optical surfaces
- Advanced microfiber fabric lifts dirt, oil, and even water from lens surfaces without lens-cleaning fluid
- This great addition to any astronomer's accessory case will not scratch, streak, or smear delicate optical surfaces

- 80/20 polyester-nylon fiber blend cloth material absorbs moisture
- Machine washable for repeated use

Description

A must-have for worry-free cleaning of optics and optical surfaces, the Orion MicroFiber OptiCloth will become your go-to cleaning cloth.

Use it to safely wipe away dirt, grime, and oily residues like pesky fingerprints from virtually any optical surface. Keep all your binoculars, telescope eyepieces, and telescope lenses sparkling clean with this scratch-free cleaning cloth. The microfiber 80/20 polyester-nylon blend material absorbs moisture instead of just puching it around to safely cleans lens surfaces without scratching , streaking, or smearing. You don't even need to use lens fluid! It's machine-washable too so it can be used and reused thousands of times. We keep one handy in every accessory case and binocular case just in case a finger happens to contact a lens while out in the field. Trust us, it happens.
