

Orion Precision Centering Adapter 2 inch

AUD \$95.00

Product Images

Short Description

- Handy extension adapter precisely centers 2" eyepieces or accessories in a telescope's 2" focuser
- Features a lateral compression mechanism for delightfully accurate centering of 2" accessories
- Centering rollers will not scratch or mar inserted eyepiece, collimating device, or other accessory barrels
- Ideal for accurate collimation tool use in reflector telescopes
- Adds 1.7" (43mm) of extension

Description

The Orion 2" Precision Centering Extension Adapter allows you to accurately center any 2" eyepiece or accessory in a 2" telescope focuser. Most standard 2" focusers use a metal thumbscrew to secure an inserted eyepiece or accessory in place, which pushes the inserted barrel laterally, i.e., off-center. This can make observations less than ideal, and can reduce the usefulness of

collimating tools. To avoid such inaccurate centering, the Orion 2" Precision Centering Adapter features a precise lateral compression mechanism. Once a 2" accessory is inserted into the adapter, a simple clockwise rotation of the knurled top ring moves two rollers toward the exact center of the optical axis, precisely centering the accessory and securing it in-place. The adapter is easy to use and is especially great for optically fast telescopes in which the eyepiece's "sweet spot" position of focus is critical for obtaining optimal views.

The Orion 2" Precision Centering Extension Adapter is especially useful for centering 2" eyepieces and imaging cameras on the center axis of a telescope's light path. The adapter also provides 1.7" (43mm) of extension which is often needed when a star diagonal is not used with refractor or Cassegrain telescopes. It's also ideal for use with reflector telescopes for critical centering of a collimating device. The adapter fits in 2" focusers and will not scratch your inserted accessories. Made of machined, anodized aluminum.

Warranty

Limited Warranty against defects in materials or workmanship for one year from date of purchase. This warranty is for the benefit of the original retail purchaser only. For complete warranty details contact us.
