Orion Spacer for Monster Parallelogram and 25x100 binoculars

AUD \$69.00

Product Images

Short Description

--

Description

This anodized aluminum spacer block is designed to be used when attaching the #9326 Orion 25x100 binocular onto the #5752 Orion Monster Parallelogram mount. It raises the binocular up above the L-bracket far enough (15mm) to allow for the full range of interpupillary adjustment, as well as helps balance the binocular on the mount when viewing at higher angles. This spacer will also

work on any photographic tripod, when a little extra height is needed for a camera, spotting scope, or binocular. Features a 1/4"-20 threaded tripod stud on top, and 1/4"-20 threaded tripod hole below.
