Short Description

--

Description

Ultra Wide Telescope Eyepiece designs are the pinnacle of eyepiece evolution and combine comfortable eye relief and wide apparent fields across the focal-length range, suitable for your astronomy observing needs.

Best identified by their extremely wide field of view, these eyepieces let you truly immerse yourself in the night sky, opening the

doorway for you to witness truly stunning views of the night sky making them excellent for deep sky astronomy. It becomes possible to bear witness to broad swathes of stars in the sky, and a quality wide field eyepiece will be clear to the edge of the field when doing so.
