Sirius Achromatic 2x Barlow 1.25 Inch

AUD \$39.00

Product Images

Short Description

Double your eyepiece collection with this short-focus 2x Barlow lens

Description

Made from metal parts and multi-coated optics, this Barlow lens provides 2x the original magnification when used with any 1.25" eyepiece. It is a short tube style, allowing for short-focus usage.

Its 1.25" barrel size makes it compatible with most modern telescopes and eyepieces. The lens aperture is 26mm.

This Barlow may also be used with diagonals - insert it between the diagonal and the eyepiece for 2x magnification, or between the diagonal and eyepiece holder for 3x magnification.
