Sky-Watcher 1.5x Erecting Lens 1.25 Inch

AUD \$29.00

Product Images

Short Description

- Used to get a top-to-bottom correct image
- Useful when a telescope is used for terrestrial observing
- 1.5X magnification
- Only compatible with refractor telescopes

Description

Sky-Watcher 1.5X refractor Erecting Lens 31.7mm

View Objects on Land and Sea

The magnifying power of many telescope models makes them ideal land viewing scopes. While refractors work for land viewing without the need for additional eyepieces, they tend to be more expensive. Refractors with the same imaging power are generally cheaper, and with the addition of an erecting eyepiece, become quite effective terrestrial scopes.

Sky-Watcher 1.5x 1.25" Erecting Tube Features

- Used to get a top-to-bottom correct image
- Useful when a telescope is used for terrestrial observing
- 1.5X magnification
- Only compatible with refractor telescopes

*Please note that this erecting tube is only compatible with Refractor telescopes, **NOT** Reflectors.
