Description

Sky-Watcher 114/450 AZ-Go2 Newtonian Telescope

The Sky-Watcher 114/450 AZ-Go2 Newtonian Reflector Telescope comes with amazing Parabolic optics and provides excellent all-around performance - best for observation of the moon, planets and deep sky objects. With the featured Sky-Watcher AZ SynScan Mount, you can easily locate and enjoy viewing night sky treasures, such as Planets, Nebulae, Star Clusters, Galaxies and much more. Find and point the sky objects with included AZ SynScan hand controller at the touch of a button! With over 42,900+ objects in the database, even an inexperienced astronomer can master its variety of features in a few observing sessions.

Features:

Magnifications: 18x, 45x (with included eyepieces)

Parabolic primary mirror

0.5mm ultra-thin secondary mirror
