

## Sky-Watcher 200/800 F4 Imaging Reflector Quattro

**AUD**  
**\$949.00**

### Product Images

### Short Description

- Aperture: 200mm (8-inch)
- Focal Length: 800mm - f/4.0

- Highest practical power: 410x
- Resolving power (arc sec.): 0.6
- Focuser: Crayford 2-inch Dual speed with 1.25 inch adaptor
- Optical Tube: Steel powder coated finish
- Mounting plate and tube rings: YES
- Piggyback bracket included with mounting rings
- Finderscope 8X50
- Excellent adjustable mirror mounting cell and superbly made 8-inch fully coated diffraction-limited pyrex paraboloidal mirror.
- Eyepiece not included.

## Description

---

### Premium Photo - 200/800 F4 IMAGING REFLECTOR

Fast Photography F/4 (8-inch) steel tube Newtonian Optical Tube with rings and mounting plate.

Classic f/4 Newtonian wide-field optical tube with super power linear 2 speed focuser and built for wide field astrophotography, the Sky-Watcher 200mm f/4 reflector will ensure you fit more sky on you CCD camera and reduced exposure times.

#### KEY FEATURES:

- User level, intermediate and advanced users.
- Highly recommended for astrophotography.
- Fast F4 focal ratios.
- Metallic high reflection coatings
- Fully baffled and blackened.
- Carbon fibre tube ( not all models )

#### OTHER INFORMATION:

- Cast Aluminum tube rings, with "V" Series Dovetail Bar
- Premium 2" diagonal
- Eyepiece LET28mm
- 2" DUAL-SPEED LINEAR POWER FOCUSER
