Short Description

The new Sky-Watcher BKP 150 OTAW Dual Speed incorporates superb mirror-set with two significant advantages

Description

The new Sky-Watcher BKP 150 OTAW Dual Speed incorporates superb mirror-set with two significant advantages. A Dual-Speed 10:1 ratio focuser is now included for excellent focusing precision. Also the tube length has been slightly shortened to optimize performance for prime-focus photography. Even better performance for astro-photography and visual use can be achieved when used in combination with Sky-Watcher's Newtonian coma corrector.

Additional Information

Specifications	Optical Design	Parabolic Newtonian Reflector
	Diameter	150mm
	Focal Length	750mm
	F/Ratio	f/5
	Highest Practical Power	300x
	Focuser Diameter	2" dual speed, crayford
	Eye Piece	2" 28mm
	Tube Weight	6kg
	Tube Dimensions	182mm x 690mm
	Shipping Weight	10 kgs
Shipping Dimensions	80x39x34 cm3
