Sky-Watcher Star Adventurer Adjusting Base on Dovetail Bar

AUD \$79.00

Product Images

Short Description

Adjustable dovetail L-Bracket with declination fine adjustment

Description

The Dovetail L-Bracket, used in conjunction with the optional counterweight shaft/counterweight also allows small telescopes (e.g. Maksutov 90mm), with a 1/4"-20 tripod fitting, to be used with the Star Adventurer. A small telescope and camera (using a ball

head, not supplied) can be mounted simultaneously on the Dovetail L-bracket. Using just the dovetail bar from the Dovetail L-Bracket, two cameras can be mounted at the same time using two tripod ball heads (not supplied).
