Short Description

Sky Watcher Virtuoso Gti 130/650 mm Tabletop Reflector

- Tabletop GOTO reflector with WiFi (handset optional)

- Telescope is controlled with SynScan Pro App for iOS and Android
- Download the free SynScan app to use the GOTO function.
- Uses standard DC12V
- Uses Sky Watcher Freedom Find dual encoder technology

NOTE: This telescope features a 'mini-Dobsonian' mount and is designed to be set up for use on a table or other elevated surface, rather than on the ground. It does not use a tripod.

Description

The Sky-Watcher VIRTUOSO GTi 130/650mm tabletop reflector is a fully automatic telescope ideal for intermediate astronomers who want portability and to get straight to business.

Aligning the Virtuoso mount does not take very long at all using the “Bright Object” alignment mode, and using the computerised SynScan system is the ultimate upgrade that allows automatic pointing and tracking of more than 42,000 objects in the sky!

Finding faint nebula is as challenge at the best of times so this means that you spend less time finding a faint nebula or a distant planet and more time to enjoy your observing. Astronomy has never been so easy!

The Virtuoso 5” Collapsible tabletop reflector is a compact and easy-to-use table top telescope, ideal for all kind of observations.

The patented collapsible system makes it is particularly easy to store and transport. You simply extend the tube, point the telescope using the red dot finder scope, insert the eyepiece and you are away on an night of observing. The Sky-Watcher Virtuoso telescope will show you Saturn’s rings, Jupiter’s bands, Mars and even phases of Venus.

Of course the moon will be spectacular in this scope.

The VIRTUOSO GTi Goto Mount – WiFi-controllable with iOS and Android and compatible with an optional Synscan hand controller, allows for smooth tracking and alignment. If you are tech savvy then you can go completely wirelss and use Wifi to control the telescope with your mobile device; smartphone or tablet, or you can use the optional Synscan handset if you like the old school feel.

For WIFI you can download the SynScan App from [Google play](#) or the [App Store](#).
