## Starlight Xpress Cooling Enhancer

**AUD \$95.00**

### Product Images

### Short Description

--

## Description

---

In stagnant air, the body temperature of our Starlight Xpress 'R' series cameras can rise well above ambient and degrade the chip cooling. This very compact add-on will keep the air moving and allow you to get the best possible delta T on the chip. It is fitted in place of the standard tripod bracket and powered by a 'Y' lead from the DC input cable. The magnetically levitated fan is quiet and vibration free.
