AUD \$49.00

Product Images

Short Description

Starry Night 8 has been retooled from the inside out to best meet the needs of the modern amateur astronomer! With a *stunning new object database, incredible integration to cloud services, and tons of new, intelligent features*, **Starry Night Complete Space & Astronomy Pack 8** sets you up for observing success like never before!

Designed for early amateur astronomy

Starry Night 8 has been retooled from the inside out to best meet the needs of the modern amateur astronomer! With a *stunning new object database, incredible integration to cloud services, and tons of new, intelligent features*, **Starry Night Complete Space & Astronomy Pack 8** sets you up for observing success like never before!

Find everything you've been looking for

At the heart of Version 8 is a **new Deep Sky Database** of extended objects that makes the Starry Night experience better than ever!

- Incredible rendering & precise positioning of over 36,000 targets
- Carefully crafted by compiling the absolute best object data available
- The *most accurate sizes & shapes of objects ever* in Starry Night
- Advanced database created from 12 cross-referenced catalogs
- *Huge upgrade* replaces a majority of previous Starry Night catalog
- *TESS* (Transiting Exoplanet Survey Satellite) and *Mars InSight* 3D models
- Hundreds of new *in-depth descriptions* for the brightest stars in the sky
- *New and updated mission paths* for your favorite space missions

Observers come first

Get ready for **the most seamless astronomy setup** you've ever experienced! Filled with new features to make observing as fun and efficient as possible, **Starry Night Complete Space & Astronomy Pack 8** will meet the needs of most advanced observers and help amateurs & enthusiasts take their astronomy game to the next level!

- *Open Astronomy Log* standard makes data much more accessible
- Easily create multiple *Observing Sites* using maps & location services
- *Audio Tours* provide engaging, in-depth narration for many subjects
- *Audio Descriptions* add hours of commentary for interesting objects
- An elegant new dark theme is easier on the observer's eyes
- Redesigned *SkyGuide* now matches new dark theme interface
- *Sky Calendar* Includes a comprehensive list of significant sky events

Put astronomy on autopilot

Integral to **Starry Night Complete Space & Astronomy Pack 8** is the **LiveSky Cloud**. In addition to being stored on your computer, all of your observing data is optionally backed up, free of charge, to our private cloud servers. The **LiveSky.com Cloud** isn't just about backup, however -- it **opens up a universe of possibilities for extending, sharing & analyzing** your observing data!

- Sync, share and export your data to other services with ease
- Data & assets entered at *LiveSky.com* sync to *Starry Night Complete Space & Astronomy Pack 8**
- Preparing sessions & recording observations is easier than ever
- *Sync to any LiveSky-enabled astro app* including *SkySafari 6**

**In order to sync ALL SkySafari 6 Plus/Pro OBSERVE features the user must have Starry Night Pro 8 or Pro Plus 8.*

Included:

- Registration details and download links to *Starry Night Complete Space & Astronomy Pack 8* for Windows & macOS
- *Starry Night Companion*, a 192-page illustrated astronomy book PDF (embedded within the program)

- New, comprehensive 146-page User's Guide PDF (embedded within the program)
- All the incredible features from our earlier versions!

Requirements:

Windows 10 or higher / macOS 10.12 or higher, 1GHz or higher processor, 1 GB RAM and 12 GB of hard disk space. 128 MB OpenGL 1.4 capable graphics card.
