Product Images

Short Description

Whether it is the way the morning feels or a special encounter with game, there are some hunting moments that you wish you could hold on to forever. Thanks to digiscoping, you can now treasure photos of these fascinating moments.

Description

TLS APO 23 mm Apochromat Telephoto Lens System for ATX / STX

The right choice for anyone who appreciates top-quality digiscoping, the TLS APO 23 mm camera lens was developed as a complete system with the new ATX/STX spotting scopes. Its excellent optical quality makes it particularly attractive to the most discerning digiscopers who want to use system cameras. The TLS APO 23 mm is supplied without the T2 adapter ring for Micro 4/3 system cameras.

Note: T-ring sold separately
