Short Description

Whether it is the way the morning feels or a special encounter with game, there are some hunting moments that you wish you could hold on to forever. Thanks to digiscoping, you can now treasure photos of these fascinating moments.

Description

TLS APO 30 mm Apochromat Telephoto Lens System for ATS / STS / ATM / STM / STR

The TLS APO 30 mm is a 30 mm camera lens that has been specifically designed for APS-C/DX single-lens reflex cameras. With its optical quality and swift transition between viewing and photography, it will appeal particularly to discerning digiscopers and observers. The TLS APO 30 mm is supplied without the T2 adapter ring for Canon, Nikon and Sony SLR cameras.

Note: T-ring sold separately
