- A beautiful but challenging puzzle to assemble. Can you do it?
- Seriously spacey fun for the whole family; makes a great gift for space enthusiasts
- Comes in re-sealable polybag (not a box), with color reprint inside to use for reference

## Description

---

Here's some seriously spacey fun for the whole family. In fact, you could even say that our exclusive Great Orion Nebula Jigsaw Puzzle is, well, a gas! It's a 250-piece puzzle that features a dazzling photographic image of the Great Orion Nebula — one of the most jaw-droppingly beautiful astronomical objects in the night sky. A gaseous stellar birthplace comprised of objects Messier 42 and 43, the puzzle image also includes the "Running Man Nebula" (NGC 1973, 1975, and 1977) to the left of the Orion Nebula. Visible in the winter sky with the naked eye, the Great Orion Nebula is also a popular target for telescope users. In fact, the image depicted on this puzzle was photographed with our very own Orion EON 104mm ED-X2 Triplet Refractor.

Don't let the ethereal beauty of the Great Orion Nebula Jigsaw Puzzle fool you, though. It may be more challenging to put together these 250 pieces than you might think! So much swirly, colorful cloudiness and so many pinpoint stars floating in black space, it just may drive you out of your mind as it transports you out of this world! But you'll have a blast doing it, we promise.

Finished puzzle measures 12" x 18". It comes packaged in re-sealable polybag containing the puzzle pieces and a reprint of the puzzle image for you to reference while assembling it.

So get The Great Orion Nebula Jigsaw Puzzle and have fun piecing together this spectacular celestial gem. Makes a great gift for astronomy buffs of any age.
