WW Astro Heated Dew Shield for 6 Inch SCT

AUD
\$119.00

Product Images

Short Description

Dew shield to prevent dew appearance and improve contrast. Easy to fit. Suitable for 6" telescopes.

NOTE: Sirius Optics recommends that any dew heater strap or heated dew shield be connected to a dual channel dew controller and not directly to 12V.

This allows the user to regulate the current and temperature of the dew heater strap or dew shield.

The recommended control unit is the Astrozap Dual Channel Dew Controller (Product No. 124474)

Description

W&W Astro flexible dew shield prevents dew appearance on the lens. It's made to be easy fit on your telescope tube. It has similar length to the telescope's outside circumference and should be placed at the front end of the tube. Inside of the shield is covered with black felt fabric to improve contrast.

Additionally, the shield has a built in 12V heater strap to provide more dew protection.
