Short Description

The IR 850nm Pass Filter is suitable for IR sensitive cameras

Description

The ZWO 1.25" IR 850nm Pass Filter is suitable for IR sensitive cameras. You don't need to debayer, and will get the full resolution of this sensor when using it with a colour camera such as the ASI224MC or ASI185MC. Because the QE response of the sensor beyond 850nm is the same, you can use a colour camera as a mono camera with this filter, just don't forget to keep the WB_R and WB_B to 50 (no White Balance applied).

To see the unseen: ASI290MM+850nm IR filter + 2.1mm lens.
