

## ZWO Unmounted 31mm LRGB Filter Set

**AUD**  
**\$249.00**

### Product Images

## Short Description

---

The ZWO LRGB 31mm Filters have better transmission, better coatings and better colour separation.

## Description

---

Name: ZWO LRGB 31mm Filters (4 filters)

Size: 31mm

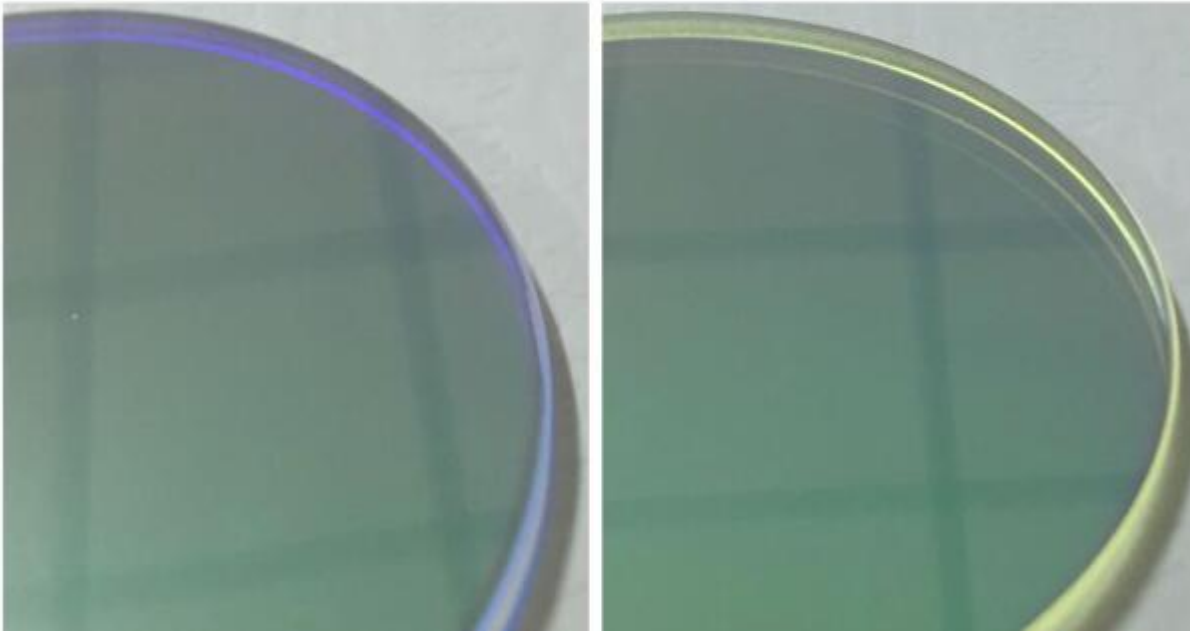

Thickness: 2mm

The RGB colour combined weights will be approximately 1:1:1

- Fine-optically polished to ensure accurate 1/4 wavefront
- More than 92% transmission at passband
- Infrared wavelength 700-1100nm cut-off
- Precision off-band blocking
- Multi-layers anti-reflection coating
- Small spectral "gap" to minimize the effect of light pollution
- More parfocal - thickness = 2mm

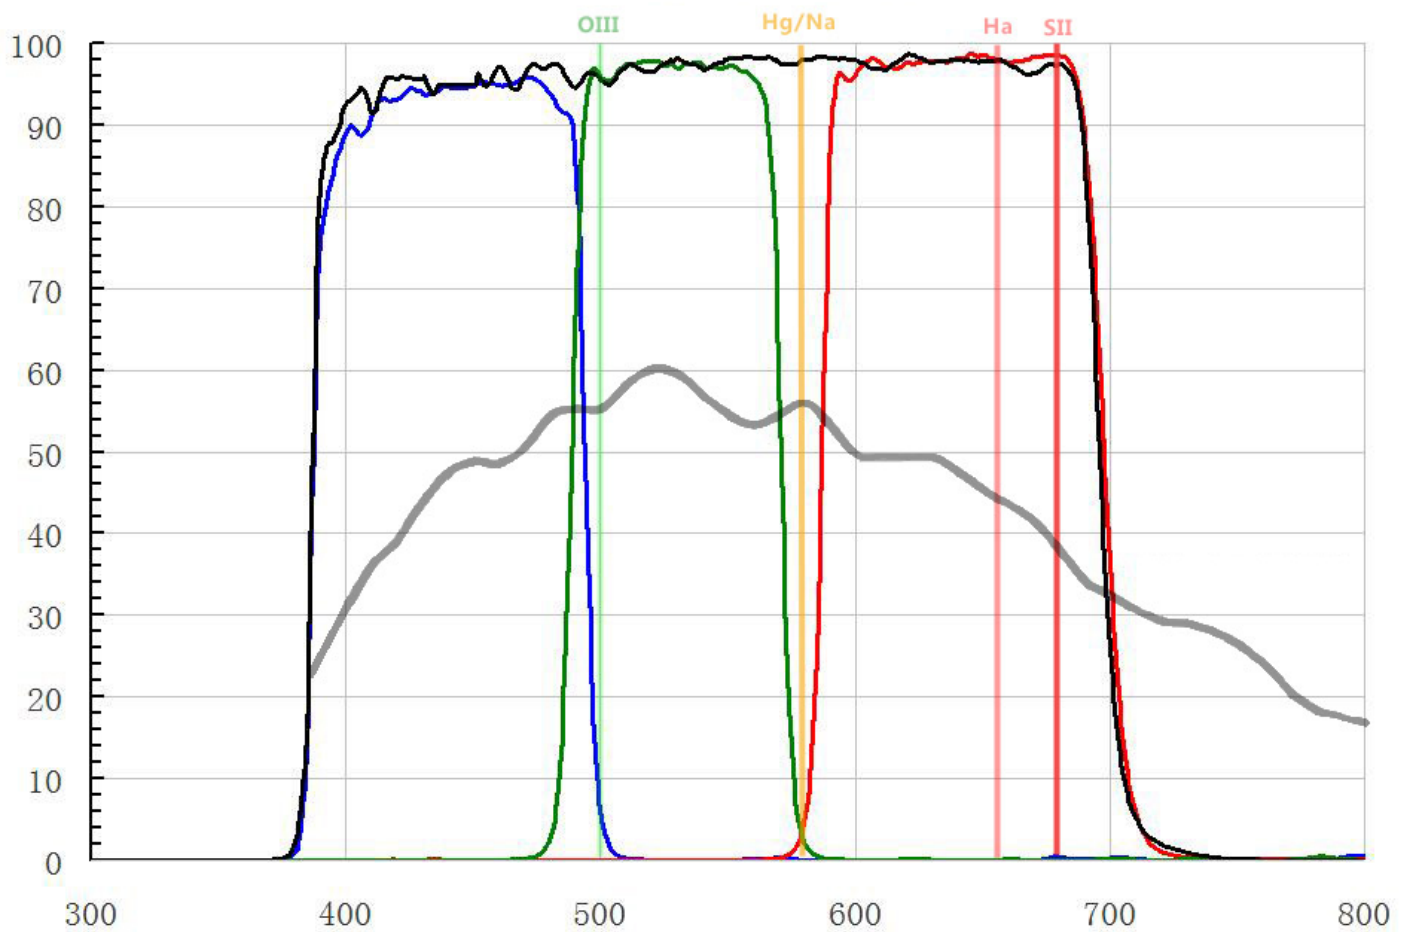

Side A Telescope side edge:  
Multilayer

Side B Camera side edge:  
Anti-reflective coating

## TRANSMISSION CURVE

ZWO LRGB Filters and Narrow Filters Curve
