Short Description

The all-rounder **saxon 114/500 AZ Reflector Telescope** features easy assembly and portability, making it THE scope for beginner astronomers.

This telescope comes with a focal length of 500mm and an aperture of 114mm which will give you good views of the Moon, planets, bright nebulae and star clusters. The aluminium optical tube also has a rack-and-pinion focuser, ensuring smooth adjustments to focus your object into place. This scope's accessory pack includes two 1.25" eyepieces, a finderscope, an erecting eyepiece, a barlow lens and an adjustable aluminium tripod with accessory tray.

For a great beginner scope without the hefty price tag, look no further than the **saxon 1145AZ Reflector Telescope**.

Description

The **saxon 114/500 AZ Reflector Telescope** is a great beginner telescope to start your astronomy journey with.

Spend time with the family in the backyard stargazing with this portable and easy to use telescope. The quality optics and 114mm aperture provides enough light to enable bright views of the sky. Setup is quick and painless, which means you'll be viewing Moon craters, planets, bright nebulae and star clusters in no time!

The **saxon 1145AZ Reflector Telescope** features the following:

- 114mm aperture
- 500mm focal length
- Two 1.25" eyepieces (10mm and 25mm) giving a broad range of magnification
- Red-dot finderscope
- 1.5x erecting eyepieces for terrestrial viewing
- 1.25" 2x Barlow Lens

Additional Information
