Short Description

..

Description

If you're fascinated with the night sky and want an upgrade from a beginner scope, the **saxon 130/900 EQ2 Velocity Reflector Telescope** is for you.

Featuring a large aperture of 130mm which gives plenty of light to help capture views of star clusters, nebulae and galaxies, these intermediate-level telescopes also comes with a good combination of accessories to help you get started on your observing session.

The **saxon 1309EQ2 Velocity Reflector Telescope with Motor Drive System** has the following features:

- 130mm aperture
- 900mm focal length (f/6.9)
- 5.2" aluminised & overcoated mirror
- Motor drive with clutch, hand control and battery case
- 5x24 finderscope
- German Equatorial EQ2 Mount
- Smooth rack and pinion 1.25" focuser
- Super 1.25" eyepieces
- 1.5x erecting prism for terrestrial use
- Aluminium tripod with accessory tray.

Why would I need a motor drive?

A motor drive helps by keeping the telescope "on target" by controlling the telescope's tracking speed to compensate for the earth's rotation during long exposure of celestial objects. This will help correct the problem of vibration when viewing a celestial object.

For bright, clear views everytime you'll want the **saxon 1309EQ2 Velocity Reflector Telescope with Motor Drive System**.

Specifications

More Information	
Warranty Information	5-Years Limited Warranty
Optical Design	Newtonian Reflector
Aperture	130mm
Highest Practical Power	260x
Focal Length	900mm
Focal Ratio	F/6.9
Eyepieces	Super 25, Super 10 and SR4
Finderscope	5x24
Barlow Lens	No
Diagonal	No
Mount Type	German Equatorial EQ-2
Tripod	Aluminium
Optical Tube Dimensions	17 x 90cm
Optical Tube Weight	4.50kg
Shipping Dimensions	115 x 51 x 26cm3
Shipping Weight	19.9kg
