Short Description

Turn heads with the compact and powerful saxon 15018 Observatory Cassegrain Telescope.

This telescope comes with a high aperture of 150mm, a focal length of 1800mm and multi-coated lens to bring you bright, high-resolution images even in dim lighting. At just under 6 kg, you'll appreciate how compact and portable this scope is when it comes to selecting the best vantage points to observe both terrestrial and astronomical objects. Just transport the optical tube, set it up on your own mount and tripod and you're ready!

Small in size but great in specs - that's the saxon 15018 Observatory Cassegrain Telescope.

Description

Keep your existing mount and tripod and upgrade your existing scope to the saxon 15018 Observatory Cassegrain Telescope.

With an aperture of 150mm to gather enough light to see deep sky objects clearly, this telescope also comes with a long focal length of 1800mm to maximise your views. This scope is built with high-resolution, diffraction-limited optical systems that are multi-coated to provide good contrast and sharp images. Whether your requirement is for terrestrial or astronomical use, this scope makes the perfect companion.

If you're looking for a full assembled product, you may like the saxon 15018EQ3 Observatory Cassegrain Telescope instead.

The saxon 15018 Observatory Cassegrain Telescope features the following:

- 150mm aperture
- 1800mm focal length (F/12)
- 90 degree star diagonal
- Red dot finderscope
- Collimation screws for primary mirror
- Plossl eyepieces

Perfect for serious astronomers.

Additional Information

Specifications	WARRANTY INFORMATION	5-Years Limited Warranty
	OPTICAL DESIGN	Maksutov-Cassegrain
	APERTURE	150mm
	HIGHEST PRACTICAL POWER	300x
	FOCAL LENGTH	1800mm
	FOCAL RATIO	F/12.0
	EYEPIECES	Plossl 25 and Plossl 10
	FINDERSCOPE	Red dot
	SHIPPING DIMENSIONS	64 x 27 x 25cm3
	SHIPPING WEIGHT	7kg
