saxon 20-60x80 ED Spotting Scope

AUD
\$1,099.00

Product Images

Short Description

The saxon 20-60x80mm ED spotting scope is ideal for bird watching, long range observation, target spotting and low light observation.

This waterproof spotting scope features a 45 degree viewing angle, fully-multi coated optics and an 80mm objective lens with Extra-low Dispersion (ED) glass, allowing for more distinct colouration and sharpness on overcast days and at dawn and dusk.

Adjust the 20-60x zoom range on the spotting scope with ease to ensure your intended object is in sight.

Description

The saxon 20-60x80mm ED spotting scope is specially designed for viewing across long ranges even in poor lighting.

The unique Extra-low Dispersion (ED) glass used in the construction of the lens promises ultimate colour fidelity, contrast and sharpness, which means you can expect high quality images with low chromatic aberration.

Perfect for amateur bird-watching, getting a close-up view at concerts and other events and for outdoor enthusiasts, the scope is very easy to use and to focus. You can adjust the zoom to make objects appear from 20 times to up to 60 times their actual size, and the scope is waterproof for use in all types of weather.
