saxon 250DS 10 Inch Astrophotography Newtonian OTA

AUD
\$1,269.00

Product Images

Short Description

You expect nothing less than crystal-clear images in your scope, but what are you going to do with the mount and tripod you already have? Mount it with the **saxon 250DS Astrophotography Newtonian Telescope**, that's what!

Combined with the aperture of 254mm and focal length of 1200mm, this scope is great for prime-focus photography. Higher quality images can be achieved with the optional coma corrector.

Description

The **saxon 250DS Astrophotography Newtonian Telescope**

This model comes in an OTA form for you to use your own mount and tripod; and customise it with your own accessories to start a

great viewing session immediately.

The **saxon 250DS Astrophotography Newtonian Telescope** features the following:

- 254mm aperture
- 1200mm focal length (F/4.7)
- 2" Dual Speed 10:1 focuser
- 9x50 finderscope
- 2" LET 28mm eyepiece.
- 2" to 1.25" adapter.
