saxon 50mm MK II Guidescope

AUD
\$249.00

Product Images

Short Description

Ideal for auto guiding long-exposures with your camera, this compact 50mm Guide scope is perfect to use on your astrophotography setup. The helical focuser makes it easy to focus on your guide stars. The guidescope attaches to the telescope using a standard dovetail mounting plate.

Description

The saxon 50mm Guidescope features a full metal build, a 50mm aperture straight-through finder that is suitable for astrophotographers of all levels. Its precise focus mechanism allows it to easily achieve focus without play or wiggle, thereby keeping the consistency of your long exposure images. For a great quality guidescope to use in your astrophotography build, look no further than the saxon 50mm Guidescope.

The saxon 50mm Guidescope features the following:

- 50mm of aperture.
- 190mm focal length and focal ratio of 3.8.
- Non-rotating helical focuser mechanism, to prevent your guiding camera from rotating.
- Compact and lightweight guidescope to avoid differential flexure on your guiding.
- Dual mounting rings with three delrin-tipped alignment screws per ring.
- 3.5" (89mm) long dovetail mounting bar.
