## Description

---

If you're after a telescope for intermediate astronomers, the **saxon 90/1250 EQ Observatory Cassegrain Telescope** will not disappoint.

With an aperture of 90mm and a focal length of 1250mm, this telescope packs a powerful punch. The high-resolution, diffraction-limited optical systems are multi-coated to maximise contrast and image sharpness, making it the perfect scope to study deep sky objects. You'll also appreciate the included accessory pack, sturdy German Equatorial mount and slow motion controls when you're tracking and focusing your object into view.

You may also want to use the **saxon 90125EQ Observatory Cassegrain Telescope** for terrestrial viewing purposes. When used with a star diagonal, images seen through the scope is rightway up. Observe the perched birds or get a quick peek at the boats out at sea. Whether your requirement is for terrestrial or astronomical use, these Maksutov-Cassegrain scopes are the perfect companion.

The **saxon 90125EQ Observatory Cassegrain Telescope** features the following:

- 90mm aperture
- Focal length of 1250mm (F/13.8)
- 90 degree star diagonal
- Red dot finderscope
- Super 25mm & 10mm eyepieces
- German Equatorial EQ1 mount
- Aluminium tripod with accessory tray.

Perfect for the serious observer.
