Short Description

Take your tracking to the next level with the **saxon Dual Axis Motor Drive with Controller Clutches, Cables and Battery**

Case EQ5.

Allowing for tracking on both RA and DEC axes at 2x, 4x, or 8x speed, the dual axis motor drive will meet all your astronomy and astrophotography needs.

Can be powered by 4 D cell batteries or 6V DC power adaptor.

Description

The saxon Dual Axis Motor Drive provides accurate, regulated tracking for EQ5.

The dual axis control is ideal for high-power viewing and astrophotography. The hand controller allows RA and DEC tracking with 2x, 4x and 8x speed.

This dual axis motor drive can be powered by 4 D-cell batteries (not included) or 6V DC power adaptor.

The **saxon Dual Axis Motor Drive with Controller Clutches, Cables and Battery Case EQ5** includes the following:

- Thumbwheel clutches on both motors
- Variable speed hand controller
- Battery pack and case.

3-Years Limited Warranty
